GENERATIVE AI

GENERATIVE
AI
GENERATIVE

Generative AI is a type of artificial intelligence (AI) that can create new content, such as text, images, and music, based on a set of input data. It is a subset of machine learning (ML) and is used in a variety of applications, including content creation, marketing, and customer service.

The AI Revolution Is Already Losing Steam

The pace of innovation in AI is slowing, its usefulness is limited, and the cost of running it remains exorbitant

By Christopher Mims [Follow](#)

[Nvidia](#) reported eye-popping revenue last week. [Elon Musk](#) just said human-level artificial intelligence is coming next year. Big tech can't seem to buy enough AI-powering chips. It sure seems like the AI hype train is just leaving the station, and we should all hop aboard.

But significant disappointment may be on the

Finance & economics | A sequence of zeroes

What happened to the artificial-intelligence revolution?

So far the technology has had almost no economic impact
